

“Enhancing Connectivity” Bibliography

W. Lance Bennett and Alexandra Segerberg, *The Logic of Connective Action: Digital Media and the Personalization of Contentious Politics* (New York: Cambridge University Press, 2013).

Takes the issues of constant connectedness to the realm of political behavior, charting how social media are both the logic and the tools of current political organization. The realm of participatory politics, studied here in depth, reflects on societal, cultural and psychological aspects of contemporary connectivity.

Danah Boyd, *It's Complicated: The Social Lives of Networked Teens* (New Haven: Yale University Press, 2014).

Zooms into the role of new media, particularly social media, in the lives and dilemmas of teen-agers. Based on in-depth interviews, the book reflects a broad understanding of technological, social and cultural aspects (even if “western”).

Henry Jenkins, Sam Ford and Joshua Green, *Spreadable Media: Creating Value and Meaning in a Networked Culture* (New York: New York University Press, 2013).

Focusing on change in the media environment, media ecology and media behavior, this broad-minded analysis of contemporary social media highlights aspects of today's media behavior. But the focus on change (perhaps inadvertently) serves a historical perspective, tracing what has changed, and at least as significantly what has not in our use of new media.

John D. Peters, *Speaking into the Air: A History of the Idea of Communication* (Chicago: University of Chicago Press, 2001).

Presents a panoramic perspective on communications as an idea, lurking in some of the most mundane and some of the most unexpected behaviors and mental biases; hence it is an effective backdrop and corrective for any specific study in comm. Could be augmented by Friedrich Kittler's *Gramophone, Film, Typewriter* for emphasis on stand alone media.

Sherry Turkle, *Life on the Screen: Identity in the Age of the Internet* (New York: Simon and Schuster, 1997).

A pioneering, foundational text in surveying the impact of the pc and early internet on society and self. Very comprehensive in its perspective, it remains useful in understand the field itself, but also the evolution of scholarship concerning it.

Zizi Papacharissi, *Affective Publics: Sentiment, Technology, and Politics* (New York: Oxford University Press, 2015).
